GND: connect gnd	V+/Vi: Power supply interface, connect to 3.3V
TX: Serial data output.	RX: Serial data input.
Working voltage: 3.3V	Size: 20.3mm*48.1mm*23.3mm

This AS608 module integrates optical path and fingerprint processing functions, small size, low power consumption, and fast recognition speed. Support 300 fingerprints to be entered and stored in itself for user identification. The module has a flat appearance, can be placed in any place, and can be widely used in life. For example, safes, smart door locks, time attendance machines, etc.
